Listing of Claims

1.-19. (Canceled)

20. (Currently Amended) A method of manufacturing a quartz glass slab ingot comprising the steps of:

providing a rotatable furnace having a feeder at a top portion thereof and a burner;

~~dropping~~feeding silica powder to the rotatable furnace such that the silica powder drops around the center of a furnace bed in the rotatable furnace through the feeder;

fusing the silica powder in the rotatable furnace;

depositing the fused silica at the center of the furnace bed; and

extending the fused silica deposit outwardly from the center of the furnace bed by heating and rotating the furnace, wherein ~~the~~ gas supplied to the burner has a hydrogen/oxygen gas ratio of from 2.1 to 2.5.

21. (Previously Presented) The method of Claim 20, additionally comprising the step of depositing zirconia particles having a diameter of 2 to 10 nm on the surface of the furnace bed prior to dropping the silica powder onto the furnace bed.

22. (Previously Presented) The method of Claim 20, wherein raw material is fed to the furnace at a rate of from 1.0 to 10 kg/hr.

23. (Previously Presented) The method of Claim 20, wherein said ingot has the shape of a column.

24. (Previously Presented) The method of Claim 20, wherein said ingot has the shape of a solid round bar.

25. (Previously Presented) The method of Claim 20, wherein said ingot has the shape of a plate.

26. (New) The method of Claim 20, wherein the silica powder drops solely around the center of the furnace bed.

27. (New) The method of Claim 20, wherein the burner comprises a hydrogen supply tube, an oxygen supply tube and a silica powder supply tube.
